

32-bit MCU SDK 6.0.2.0 GA

Gecko SDK Suite 3.1

April 7, 2021

The 32-bit MCU SDK provides sample applications for EFM32 and EZR32 development kits.

This document covers the following SDK versions:

6.0.2.0 released April 7, 2021 (underlying platform changes only)
6.0.1.0 released January 27, 2021 (underlying platform changes only)
6.0.0.0 released December 9, 2020

KEY FEATURES

- Added platform examples for EFM32 series 0 and series 1 devices
- Reduced number of sample applications for EFM32 hardware kits
- Reduced pre-compiled demo list for EFM32 hardware kits

This Gecko SDK Suite release has a known security compatibility issue with one Gecko Platform component. For more information about this, as well as other updates and notices, see the Security chapter of the Gecko Platform Release notes installed with this SDK or on the [Silicon Labs Release Notes page](#). Silicon Labs also strongly recommends that you subscribe to Security Advisories for up-to-date information. For instructions, or if you are new to the EmberZNet SDK, see [Using This Release](#).

Improvements

Changed in release 6.0.2.0

- Re-added sources for the “factory_demo” sample application.

Changed in release 6.0.0.0

- Renamed the sample application called “helges_demo” to “factory_demo”, to make it more descriptive.
- The following sample applications have been modified to improve integration in Simplicity Studio 5:
 - micriumos_canopen
 - micriumos_net
 - micriumos_webmic
 - si72xx_wheeldemo

Fixed Issues

None

Known Issues in the Current Release

Issues in bold were added since the previous release. If you have missed a release, recent release notes are available on <https://www.silabs.com/products/software>.

ID #	Description	Workaround
	Both Debug and Release build configurations of MCU examples define <code>DEBUG_EFM=1</code> , which enables <code>em_assert</code> functionality.	
	<code>micriumos_lwip_wfx</code> example for <code>SLSTK3701A_EFM32GG11</code> is not compiling when using the Simplicity Studio IDE.	

Deprecated Items

None

Removed Items

Removed in release 6.0.0.0

The following examples were removed:

Using This Release

The 32-bit MCU SDK v 6.0.x is optionally installed with Gecko SDK Suite v3.x in Simplicity Studio 5 for EFM32 and EZR32 products. Installation instructions are available in the [Simplicity Studio 5 online User's Guide](#). This release contains the following.

- EFM32 and EZR32 sample applications

This SDK depends on Gecko Platform. The Gecko Platform code provides functionality that supports protocol plugins and APIs in the form of drivers and other lower layer features that interact directly with Silicon Labs chips and modules. Gecko Platform components include EMLIB, EMDRV, RAIL Library, NVM3, and mbedTLS. Gecko Platform release notes are available through Simplicity Studio's Launcher Perspective..

7.1 Compatible Software

This version of the 32-bit MCU SDK is compatible with the following tool chains.

- IAR Embedded Workbench for ARM (IAR-EWARM) version 8.30.1
- GCC (The GNU Compiler Collection) version 7.2.1 is provided with Simplicity Studio
- Keil MDK V5.25 for ARM

Security Advisories

To subscribe to Security Advisories, log in to the Silicon Labs customer portal, then select **Account Home**. Click **HOME** to go to the portal home page and then click the **Manage Notifications** tile. Make sure that 'Software/Security Advisory Notices & Product Change Notices (PCNs)' is checked, and that you are subscribed at minimum for your platform and protocol. Click **Save** to save any changes.
